

Subject: calibration accreditation  
Date: 1 September 2009

We hereby declare that we are allowed to calibrate equipment that we have produced, however we are not an accredited calibration laboratory by the Dutch Accreditation Council RvA.

Calibration will be performed according to our calibration procedures which are controlled through our NEN-ISO 9001-2008 quality management system.

Instruments used for calibration are traceable or calibrated through calibration laboratories which are accredited by the Dutch Accreditation Council RvA ([www.rva.nl](http://www.rva.nl)).
